## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, we are happy to report that we have had 3 infrared touchless thermometers loaned to us so far. Two from staff and one from a family member. This will lighten the load!

The staff at St. Pat's continue to do their very best to keep the residents safe and happy. There continues to be laughter, smiles and love. The staff are fully aware of the provincial social distancing protocols in place.

We are in the process of contacting all staff who are working in a second health care organization and requesting that they choose to work in only one. A great number are choosing St. Pat's. We are doing this as an extra precaution to stop any spread of the virus between organizations. This is difficult for staff as they are committed to both but unfortunately this is necessary during this pandemic. We appreciate those who have chosen St. Pat's and understand that for those who have chosen their other workplace that it is in the best interests for them and their families. We look forward to them returning when we are through this period.

Waterford remains on isolation as we await test results. We do have an additional resident being investigated for respiratory symptoms but both are feeling better. We will let you know the results as they are available.

Stay well and continue to care virtually.

Janet Morris
