## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello,

We received one resident swab result and it is negative for COVID-19. We are awaiting one other test result.

The current protocol requires a COVID-19 test for any and all who have any respiratory symptoms. As soon as any respiratory symptom is noted and then while awaiting test results residents are in isolation and staff follow the required infection control protocols.

Staff who have any respiratory symptoms are considered high priority for COVID-19 testing. While awaiting test results they are in self isolation at home. Once they have a negative test result and have no respiratory symptom they can return to work. To date all testing has been negative for COVID-19.

Please keep your self healthy at home,

Janet Morris  
President & CEO
