## UPDATE TO ALL FAMILY AND FRIENDS

Hello, **we remain COVID-19 free as of today**. There continues to be a few swabs done daily whenever there is any resident or staff member with typical or atypical symptoms. We are relieved every day when we receive negative COVID test results. We have not yet heard any details about expanded testing at St. Pat's.

Everyone continues to work very hard at screening, monitoring and ensuring that we are picking up any signs or symptoms very early. Any resident with **any** symptoms is immediately isolated and tested. Staff with any symptoms do not work and go for testing. As soon as a negative test result is received they are then able to return to work when symptom free. Remember there are still other illnesses circulating in the community.

Friday is Crazy Hat Day at St. Pat's and I am told that there are some projects happening with staff and residents making some hats! I am looking forward to seeing some of these creations on Friday.

Be well and take care,

Janet Morris  
President & CEO
