## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, we have had a couple of inquiries about whether flower deliveries are okay at this time, and the answer is yes. I know that Mother's Day is coming this Sunday and speaking as a Mom, I would certainly encourage anyone to celebrate their mother with flowers!

There have been no positive COVID19 swab results received for residents or staff since May 5. We continue to test anyone with any typical or atypical symptoms, and are awaiting the results of a number of swabs.

As of yesterday afternoon, Galway has an enteric outbreak, with 3 residents meeting the outbreak case definition and 3 others who had one symptom but do not meet the enteric case definition. During this pandemic we are considering any symptoms as possible COVID19 and have completed a swab for all of the residents with enteric symptoms and anyone sharing a room with a symptomatic resident. While we await these test results these residents will be on droplet precautions. All of the families on Galway have been notified of this outbreak.

Take good care and be safe,
