## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, Happy Mother's Day to all of the mothers, living, working and part of the St. Pat's family. We celebrate all of you today. This year is very difficult as we cannot spend time with our mothers or our children. This is unfortunately the reality that we are all living right now. The mothers living at St.Pat's are very loved based upon the number of flowers arriving over the past few days!

I know that many other milestones for residents have occurred in the past 8 weeks, including birthdays and anniversaries, which have been celebrated in different ways which is not your or our choice. I hope that you are taking care of yourselves even as you miss your family here.

We have now received the results from the testing for the enteric symptoms on Galway and I am so relieved to let you know that all were negative for Covid19. The outbreak is confirmed as an enteric outbreak. We have no new positive COVID19 test results from any other swabs.

Although we are separate we are all still connected.
