UPDATE TO ALL FAMILY AND FRIENDS

Hello, we have no new positive COVID19 test results for resident or staff members. Great news! As I have mentioned before, we are checking everyone's health and taking everyone's temperature twice per day. Anyone with any symptoms, are being tested, therefore on a daily basis we have swabs being done and are awaiting the results.

The residents across the home are still remaining in their rooms to limit any potential spread between residents. The residents although not interacting with each other are interacting with staff who are doing their care, bringing meals, continuing with restorative programs, cleaning the room and bringing the telephone, iPad or tablet for calls. I know that it is not the same as when there are various activities going on and everyone is eating together, however, we are doing everything we can within the public health directives we are currently dealing with. We have continued to hire staff and they are working very hard to keep residents as engaged as possible.

Thank you to those who sent in cards and notes for all of the mothers at St. Pat's. I am including a picture of our display of these wonderful sentiments.

Be well,

Janet Morris
President & CEO
