## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello on this long weekend, the traditional start to summer in Canada. This year it just does not feel that way, both due to our separations but also the cool weather.

St. Pat's has no new positive resident COVID19 results, but unfortunately, we have received notice that a staff member has tested positive although they have no symptoms. They are self-isolating at home and we wish them a full and speedy recovery.

As all staff wear masks and face shields during resident care and interactions the resident risk exposure is very limited. We are in contact with public health and following their directions. We as always will continue to monitor all residents for any typical or atypical symptoms.

The enteric outbreak on Galway continues as a couple of residents continue with symptoms.

Stay safe at home,

**Janet Morris**  
President & CEO
