UPDATE TO ALL FAMILY AND FRIENDS

Hello, we have a good news day. We have no further positive COVID19 results as of today. Porch visits are a great success with this good weather. If you are planning a porch visit and the weather changes, the visit can easily be modified to have a window visit.

The enteric outbreak on Galway will be over tomorrow morning if all residents remain symptom free! Window and porch visits can then be resumed within the limitations of the already scheduled visits. Contact Cheryl Elliott to schedule a visit.

The residents on Waterford who were Covid19 positive are now showing symptom improvement and if this continues the Waterford 'outbreak' will soon be over! We are continuing to closely monitor the residents and are hopeful that their symptoms continue to improve. The public health guidance is that the residents must not have a temperature and that there are 72 hours of continuous symptom improvement to be considered recovered. Once we hit that mark, the residents on Waterford will be able to have window or porch visits.

The swab results for the additional residents on Kerry who were tested as a precautionary measure are in process and when we know the results we will provide that information both to the individual families and as a summary in the update. We have 1 positive case on Kerry at this time, so all of the residents living there remain on full precautions.

Please keep those positive thoughts coming!

Take care of yourselves and be safe at home.
