UPDATE TO ALL FAMILY AND FRIENDS

Hello, we have not received any further positive results as of today. Unfortunately, we have also not received some results from swabs done last week, so as of today we remain in outbreak. We are checking for the results every few hours and are hoping that these results will be available from the lab very soon. This is certainly frustrating for everyone, resident, staff, myself and you.

Today at St.Pat's we have our dedicated staff caring for the residents with support from the Ottawa Hospital staff who have finished their orientation and are getting to know the residents and the daily routine. We are also pleased that the new Social Engagement staff have finished their orientation and are also getting to know the residents and making sure that you stay connected with your loved one.

Be well and stay safe,

Janet Morris
President & CEO
