UPDATE TO ALL FAMILY AND FRIENDS

Hello, we have not received any positive test results today. At this point our outbreak continues although there are no resident cases, but only staff who although asymptomatic have tested positive.

We are implementing the modified dining program tomorrow at the lunch meal and will continue on a rotating schedule for all residents over two days for lunch and dinner. Each resident will have one meal every second day in the dining room. Residents eating in their room will be served first and then the resident will be served in the dining room. We will be adapting as we try this and make the necessary adjustments.

Garden visits have started today and will be weather dependent. The home area's not scheduled on a given day for the garden may still go outside for walks accompanied by a staff member in other areas of the grounds. This will be based upon availability of staff between the other scheduled skype, facetime, window and porch visits. Staff will continue to accompany residents to the balconies for some fresh air.

Small group programming can now restart on the home area, with only those residents and focus on programs which do not have any shared items being touched by a number of residents. The recreation programs must also follow the principles of physical distancing. Any articles used for any program must be disinfected after the program. The entertainment programs continue to be televised in the Gathering Place at 2pm. Tuesday, Wednesday and Thursday.

Be well and stay safe at home,

Janet Morris
President & CEO
