UPDATE TO ALL FAMILY AND FRIENDS

Hello, there are no new positive cases at St. Pat's. As mentioned yesterday at this time we have the one staff member who is positive and recovering at home. There are no resident cases.

The garden visits schedule is in place but will be weather dependent. Yesterday's afternoon rain meant that the planned visits were shifted to the balcony. The recreation staff will continue with the schedule based upon the weather.

The lunch meal service today was the start of our modified dining program. Seven or eight residents had their meal in the dining room with the remainder having their meal in their room. Dinner will have a different group of residents going to the dining room. As with all new routines we will work through the process over the next few days!

You will start to receive the monthly statements for family members soon. The one family member who receives these statements will find a special gift in the envelope. A crocheted heart pin with a 'Thinking of You' message from the staff of St. Pat's. We have made a heart for each resident also. This is to let you we are thinking about you and that we are caring for your loved one. The hearts were crocheted by the wonderful volunteers of St. Patrick's Home.

The Church School of St. Elias Cathedral is wanting to let residents at St. Patrick's Home know they are not alone or forgotten during this time of COVID. They initiated a project called "Project Heart Warmers". They had children create hearts with the words faith, hope, peace and love written on them. The hearts will be put up in each residents' room today.

The kindness of the community has been greatly appreciated by the staff and residents.

Stay safe at home,

Janet Morris
President & CEO
