UPDATE TO ALL FAMILY AND FRIENDS

Hello, unfortunately we have had a positive resident result for a resident on Galway from the resident swabs done this week. We are in contact with Public Health.

Galway will now be in full isolation with both droplet and contact precautions (gloves, mask, face shields or goggles and gowns). The residents will be served their meals in their rooms and will be asked to stay in their rooms. Any scheduled window visits will need to be cancelled for those residents on Galway, however virtual visits will continue.

We are still awaiting more resident results and will keep you informed if there are any further positive cases.

This is a challenging time for the residents, their families and all of the staff. We continue to do everything possible to reduce the potential spread by following all of the infection control best practices.

We will continue to provide updates this weekend.

Stay strong,

Janet Morris
