UPDATE TO ALL FAMILY AND FRIENDS

Hello, we continue to receive negative results for resident swabs. To date we have one positive resident case on Galway as was reported yesterday but all other results are negative. We are only awaiting test results for 3 residents from the testing last week.

Ottawa Public Health has extended the period of time for resident contact tracing related to the one positive staff member going further back to early last week, therefore Waterford is now on full precautions as an extra protection. The appropriate family member or POA for all residents on Waterford were contacted last evening to inform them of the new protocol. Unfortunately, this means that the window visits for these residents have been cancelled although virtual visits can continue. Meals will be served in their rooms as well.

The staff continue to do their very best to keep residents isolated and are using the necessary PPE to contain this virus. They are our hero's yet again.

Be safe,

Janet Morris
President & CEO
