## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, we have now received all of the resident test result from the surveillance completed last week. The three remaining results received today are all negative! We should be out of outbreak on August 12th as long as there are no further cases, following confirmation with Ottawa Public Health. Staff surveillance testing has started again this week and will finish on Friday. Positive thoughts for negative results!

Window visits continue for those home areas that are **not** on full precautions (Wexford, Kerry, Kilkenny, Cavan and Donegal) and meal service in the dining room continues with the necessary appropriate distancing and a scheduled rotation for those residents. The residents on the four home areas on full precautions (Galway, Waterford, Carlow and Dublin) unfortunately cannot participate in window visits and all meals are served in the resident rooms. Virtual visits continue across the whole home to keep everyone connected.

Please call the RPN for any updates on residents.

Be well and safe,
