UPDATE TO ALL FAMILY AND FRIENDS

Hello, today we had a delay in Ottawa Public Health declaring the outbreak over. I am sorry that this has happened, and can assure you that we have been in discussion with Public Health multiple times today. They were awaiting one resident swab result from Sunday, Aug. 9 before they would declare the outbreak over. We have now received this result and it is negative, therefore the outbreak has been declared over by Public Health!

As you know we are always daily doing swabs for residents who have any typical or atypical symptoms and this has been ongoing to ensure that know the status of any resident with symptoms. This will continue going forward.

We can proceed with visiting in both the garden and indoors. Garden Visits will resume for those visits scheduled for Wed. Aug. 12 and ongoing. If you are planning on an indoor visit, you will need to attest that you have had a Covid19 negative test within the past 14 days. These visits are back on as of 2pm today!

Thank you for your patience and we look forward to seeing everyone back!
