UPDATE TO ALL FAMILY AND FRIENDS

Hello, St. Pat's has returned to our new 'normal' with the outbreak declared over on Saturday.

Our hairdressing service has resumed today!

Visitors are welcomed back inside if they have a Covid19 negative test result in the previous 14 days. Masks are required but there is no longer a need for eye protection. Please continue to be very careful with you hand hygiene and limiting interactions with other residents. If you have any possible symptoms or have been in contact with anyone with symptoms, please do not visit.

Meal service in the dining rooms has resumed. We now have 6 resident home areas fully equipped with the plexiglass shields in the dining rooms and therefore able to have 16 residents per meal. The remaining 3 home areas should be finished this week to expand the dining room service.

Garden visit schedules have been resumed and will continue based upon the weather and demand. We will review this on a weekly basis to determine whether it is feasible to continue.

The updates will be sent now every Wednesday, unless there is new information to communicate.

Stay well, keep physically distanced and be safe.
