UPDATE TO ALL FAMILY AND FRIENDS

Hello, we received 2 more positive staff results. In this round of testing we have now received 4 positive staff results. The two newest cases were people who worked on home areas that were already using full isolation precautions and droplet contact precautions. There is therefore no requirement for any further precautions as a result of these cases. All staff are already wearing full PPE in all interactions with residents therefore the risk to residents is very low.

Ottawa Public Health considers this a continuation of our existing outbreak and there are no further actions required at this time.

Although it is a challenge to cope with all of the isolation precautions and PPE requirements when there are positive staff cases identified, it is good that we are finding these cases with the two week testing protocols.

Take care and stay safe,

Janet Morris
President and CEO
