## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, we have no further positive results and continue to monitor all residents for any typical or atypical symptoms of Covid19.

We have had further discussion with Public Health regarding options for people to go outdoors, beyond the balconies on each floor. They have agreed that residents can go outside for some fresh air for those home areas not on full outbreak precautions. In order to limit the risk for residents to be interacting with other residents, we will be setting up a schedule for the use of the secure garden. There will be specific time slots for each home area to go to the garden, which will reduce the risk of residents from across the home being together. Even outside everyone will need to wear their mask and eye protection, maintain 2m. distance from others and perform good hand hygiene. We will have the schedule ready for tomorrow and will provide this in the update.

Staff testing will be occurring this week from Wednesday to Friday.

Be well and safe,

***Janet Morris***  
President and CEO
