UPDATE TO ALL FAMILY AND FRIENDS

Hello, we were informed yesterday afternoon that a sitter working with a resident on Wexford has tested positive for Covid19 during their bi-weekly surveillance testing. This person was asymptomatic and worked specifically with one resident. All of the families of the residents on Wexford were notified last evening.

Ottawa Public Health has identified that the whole home area will be on droplet and contact precautions at this time, and they will evaluate the situation over the next few days. The residents will be served their meals in their room and are asked to stay in their rooms. Designated caregivers can still visit with the necessary PPE of mask, eye protection and gown. We are continuing to review this situation with Public Health and will keep you informed as guidance changes.

Take care and stay safe,

Janet Morris
President and CEO
