UPDATE TO ALL FAMILY AND FRIENDS

We have not received any additional positive results as of today.

The staff surveillance testing started again this week on Wednesday and will be finished tomorrow. We will start receiving results in the next few days.

We are looking at having a process for families and residents to access the Harvest Room as an alternative location for visiting. I know it has been hard to be restricted to the resident's room and we are looking at alternative spaces for individual residents and families to visit while maintaining social distancing. The goal is to have a schedule posted on each Harvest Room door that families can self schedule when they would like to use the room as of early next week. The timeslots will be approximately 30 minutes to ensure that all families wishing to use this space have an opportunity. As soon as the schedules are ready, accommodating the care conference schedules, we will let you know and you can start scheduling your use of the room.

Be well and stay safe,

Janet Morris
President and CEO
