## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, we unfortunately were notified that there is a positive case of a sitter on Galway, and a positive staff member on Galway. It has been confirmed through contact tracing that these cases were not as a result of transmission at St. Pat's as both are close contacts outside of the Home. Unfortunately, Galway is now on droplet/contact precautions and the residents will be asked to remain in their rooms. Residents meals will be served in their rooms. Resident testing will occur in the next couple of days on Galway.

The resident results from the testing last week on Wexford and Waterford have now all be received and all are negative.

The other good news today is that the vaccination clinic coordinated by Ottawa Public Health and the Ottawa Paramedic service which was held on Saturday resulted in 100 vaccinations being given, with 26 designated caregivers, 71 staff and 3 residents receiving their first dose of the vaccination! Even with the very short notice a great result.

Be well and stay safe,
