## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, we were notified that there is another positive case of a sitter on Wexford. This new case does not change the current protocols on Wexford as full isolation precautions have been in place.

The residents on Galway have all be tested and we are awaiting these results.

You may have seen staff wearing a new green button. The St. Patrick's Home Foundation has provided buttons for our staff who have been vaccinated with the two doses of the Pfizer vaccine. They state: 'Working together to stop Covid19' or 'One more vaccine for the Team'. We would also like to offer this button to families as a recognition for those who have also received the full two doses of the vaccination. We know that the delivery of the Pfizer vaccine to Canada is currently being impacted and some people have been delayed for the second dose but it will come (eventually). Once you have received the second dose, please bring the confirmation to Reception so we can ensure that we have it documented and they will be able to provide you with the button. Please wear them with pride!

We are awaiting information on when the second doses for the resident vaccinations will be provided. I cannot tell you yet when these will be scheduled but we know that resident vaccinations remain the top priority. As soon as we have any information we will provide this to you.

Stay safe,

***Janet Morris***
