UPDATE TO ALL FAMILY AND FRIENDS

Hello, the resident and staff PCR testing is being completed. Staff PCR testing is taking place in the same location as the rapid testing and therefore it is a very busy place. Please note that there are much longer waits to get testing completed due to the requirement to test all staff with a PCR test due to our outbreak. We should return to our previous line up once all of the staff have had their PCR test completed. Also as a reminder, staff will be prioritized for testing.

Resident testing is ongoing for all residents in the home. Families will be informed of the results as they are received.

As we know the number of positive cases has increased in the community, and unfortunately this increases the risk of positive cases in LTC Homes. Please remember to follow all of the Ottawa Public Health precautions.

Stay safe, wash your hands, wear a mask and get your vaccination as soon as possible.
