## **UPDATE TO ALL FAMILY AND FRIENDS**

All of the resident results are now received and all are negative for the swabs completed last week. We have just been informed by Ottawa Public Health that we are now required to re-swab all of the residents on Wexford for a PCR as an extra precaution. The goal is to complete this today and hopefully we will have all of the results in the next few days.

All staff are finishing their second PCR swab this week as per the Public Health requirement. All results received from both last week and this week are negative.

St. Pat's Foundation held a fundraising event last week on St. Patrick's Day and as part of the evening showed a video: St. Pat's – A Year in Review. I am attaching the link for this video which provides a summary of the extraordinary year 2020 we have experienced! Our hope now is that 2021 will see some glimmers of normal again.
