## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, unfortunately St. Pat's has been informed of another positive asymptomatic staff result late last evening from the surveillance testing being done. Therefore, Donegal will be on full isolation precautions, with resident meals served in their rooms and full droplet and contact precautions required. Staff and designated caregivers are required to wear mask, eye protection and gowns. This is very difficult for everyone, residents, staff and designated caregivers.

Wexford remains on full droplet and contact precautions as well with resident meals served in the resident rooms. We do not believe that this new case will impact the goal of having the isolation precautions on Wexford removed Saturday March 27<sup>th</sup> which Ottawa Public Health will need to authorize. We will keep you updated as we have information.

Be safe and stay strong,

***Janet Morris***
