UPDATE TO ALL FAMILY AND FRIENDS

Hello, all of the recent Covid19 test results received have been negative. Wexford is now off of full isolation precautions and residents can have meals in the dining room, enjoy the garden during the scheduled time slots and the PPE requirements are eye protection and mask.

Donegal remains on full isolation precautions.

There have been some questions from designated caregivers about breaks for staff who are doing the rapid testing. There is one RPN in the rapid testing clinic who is responsible for completing the actual swab. This person does need to have breaks during the day. This will result in a delay for swabbing. The other people who may be present in the rapid testing area are not able to do the actual swab.

We have chosen not to replace the RPN in rapid testing while on break as that would mean that we need to pull someone from a home area providing resident care which I know you agree is the top priority. The RPN will be on break at 12:30 to 1:00 pm and at 5:30 to 6:00 pm each day.

Stay safe and follow the necessary precautions,

Janet Morris
President and CEO
