## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, we are now considered in 'suspect outbreak' due to the one positive case on Kilkenny from late March. If there are no further cases we will be cleared on April 12<sup>th</sup>. The significant differences when in suspect outbreak is that we can now resume admissions to St. Pat's, the hairdresser can resume with one home area per day and residents from one home area can attend Mass in the Gathering Place.

Today we are doing a vaccination clinic on site for residents and staff. We are able to provide vaccines to those residents who require a first or second dose. Hurray! In addition, we are providing a first dose of the vaccine to a number of staff members on site. This is great news! We cannot provide vaccination to designated caregivers or give a second dose to staff at this time, but hopefully as the vaccine supply increases this will become an option.

The next planned update will be on Wednesday April 14<sup>th</sup>.

Enjoy the spring weather and be safe,
