## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, there are no new positive test results to report.

Those residents on Galway and Donegal who had any potential contact with a positive case are having a swab done today. The first results were negative but Public Health has recommended that a second swab be done 7 to 10 days from the potential contact.

The community level of positive Covid-19 cases continues to be a great concern. Please follow all of the public health guidance to keep yourself, your family and the residents safe.

The next planned update will be on Monday April 26<sup>th</sup>.

Have a great weekend,

***Janet Morris***
