UPDATE TO ALL FAMILY AND FRIENDS

Hello, all resident Covid19 results are negative.

The Carlow residents on isolation will be off of isolation as of tomorrow. The Donegal residents on isolation will be off of isolation on Friday April 30th.

Rapid testing continues for all staff and designated caregivers. Although there was a positive rapid test on the weekend, there is no implication for the home as the person had not been at St. Pat's for a at least 5 days and therefore not considered a contact for anyone here. This is the purpose of the rapid testing, to identify any potential positive cases early and ensure that the contact exposure in the home is minimized.

There have been some changes to Directive #3, for LTC Homes under the LTC Homes Act, Issued under Section 77.7 of the Health Protection and Promotions Act by the Chief Medical Officer of Health, as of Friday April 23rd regarding various processes based on vaccination status for residents and staff. We are in the process of reviewing these changes to understand them further. As soon as we have more clarity on the implications we will provide further information.

Be well and stay safe,

Janet Morris
President and CEO
