## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, we have not received any further positive rapid test results. The resident results from Dublin for those residents tested last week, who had a potential exposure, are all negative. On the weekend, Ottawa Public Health determined that the other residents on Dublin should be placed on isolation and tested as well. These results have now been received and they are all negative. We are awaiting a response from OPH on the next steps for the group of residents who did not have close contact but were tested over the weekend.

We have had a number of new people move into St Pat's over the past few weeks and we welcome them.

A vaccination clinic for residents and staff is planned for Friday. Residents requiring a first or second vaccination will have this available on Friday. Staff members are able to receive their first vaccination as well at this clinic. Unfortunately, we cannot offer vaccination to designated caregivers at this time.

The next update is planned for Wednesday May 5<sup>th</sup>.

Be well and stay safe,
