UPDATE TO ALL FAMILY AND FRIENDS

Hello, last night a staff member tested positive on a rapid test and we are now awaiting the PCR result. The staff member did not work with residents last night but did work this week and therefore the residents have potential exposure. The residents on Cavan unfortunately will be on isolation while awaiting the PCR result. Once we receive the result, the next steps will be determined.

The goal of rapid testing is to ensure quick identification of a potentially positive person and therefore minimizing the potential exposure. Rapid testing continues daily for staff and sitters who are not vaccinated, and every 48 hours up to 3 times per week for those who are vaccinated.

There is no change for residents on other home areas.

Stay well and stay safe,

Janet Morris
President and CEO
