## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, Cavan is unfortunately in suspect outbreak. The staff PCR result from last week was positive. The residents have had a PCR swab completed and we have received negative results for all of the residents. The residents will have a second PCR completed at day 7 following the exposure.

The residents are on isolation precautions, having their meals in their rooms and the required PPE is face mask, eye protection and gown.

Staff who worked will also have a PCR completed as a precaution.

The other home areas can continue with 'normal' activities and have no additional precautions.

Be well and stay safe,

***Janet Morris***
