UPDATE TO ALL FAMILY AND FRIENDS

Hello, there are no outbreaks at St. Pat's thanks to everyone's vigilance with screening, following all of the infection prevention and control practices, getting vaccinated and keeping the residents and each other safe. We know that the fourth wave is certainly here and we all need to work together to keep each other safe.

Third Covid19 Vaccine

The third doses of the Covid19 vaccines are now available for those residents who had their second vaccine at least 5 months ago. The consents for those residents who are wanting a third dose of the Covid19 vaccine have been received. Tomorrow, Wednesday September 22nd we are starting to administer these third doses and hope to finish giving the vaccine to all of the residents who are eligible on Thursday September 23rd.

The residents who are not yet eligible will be offered the vaccine when they are able to get the third shot.

Dining Room Chairs

The dining room chairs need to be refinished! Please take a moment when you come in to visit this week to give us your opinion on the colour for the upholstery for the seat. There are three options of upholstery that we are considering for your input. It is easy, just put a checkmark beside the one you prefer.

As we wanted to get this information out today, this will be the weekly update. Look for next week's update on Wednesday as usual.

Be well and stay safe,

Janet Morris

President and CEO
