## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, unfortunately with rapid testing last night, a fully vaccinated staff member was identified as positive for Covid19. They are now at home isolating and awaiting the results of the full PCR test and we wish them well. There are residents on Kerry who did have contact with this staff member over the past couple of days. Those residents who had contact are currently in isolation and their POA's have been notified. We have reached out to Ottawa Public Health regarding this situation and are awaiting direction from them on the next steps. The protocols are constantly changing and vary based upon vaccination status, so we want to get their current direction for this situation.

As we all know there are breakthrough positive cases in people who are fully vaccinated and the continued use of rapid testing as one of the infection prevention and control strategies is very useful.

We will keep you up to date as information is received and we know how we will be proceeding.

Be well and stay safe,

***Janet Morris***
