UPDATE TO ALL FAMILY AND FRIENDS

The suspect outbreak continues on Kerry. Thankfully all of the first resident Covid19 tests were negative. A second swab will be completed today and if all remain negative the suspect outbreak will be over on Saturday November 6th.

Rapid testing continues with everyone who is fully vaccinated once per week. Please try and have your rapid test done during the week as we are not staffing the rapid testing room on weekends. The priority is to ensure that the staff are on the home areas on the weekend for resident care.

Anyone who is not fully vaccinated with 2 doses completed 14 days ago must complete a rapid test at each visit.

We are exploring the implementation of an electronic screening tool in the next few weeks, for those who have the technology and are able to complete it. We will start with staff and then move to designated caregivers to implement the tool. The option of using a paper process will remain for those who do not want to use the electronic tool. We are hoping that this makes the screening process more streamlined and eliminates some of the paper! Stay tuned as we work through an implementation plan.

Be well and stay safe,

Janet Morris
