## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, we received positive results for Covid19 for 2 residents, one on Carlow and one on Waterford. One resident who was previously positive is now resolved. Therefore in total there are 2 residents at this time who are Covid19 positive.

Unfortunately we received a positive rapid test for a staff member who worked on Kerry and therefore there are some residents who are now in isolation on Kerry. These resident's families have been notified.

We are still awaiting PCR results from January 1. We have been told that when we there is a positive result we will be notified right away, however, when the results are negative it may take some time. We continue to discuss options with Ottawa Public Health regarding the PCR testing delays.

Please stay safe and keep well,
