UPDATE TO ALL FAMILY AND FRIENDS

Hello, I hope that everyone is safe with our snowy weather and staying home if you do not need to go out.

Over the weekend we had a couple of positive rapid tests for staff affecting some residents on Cavan and Galway. Unfortunately, Galway is now considered in case management with one positive staff case.

This morning there was a positive rapid test for a staff member who has worked on Carlow. The residents who are considered a close contact will be in isolation.

This morning we also received a positive result for a resident on Wexford. Wexford is now considered on suspect outbreak again. There are some residents who are considered close contact and will need to isolate.

We do have some residents who are completing their 10 day isolation period and will be off of isolation.

The families of residents who are either newly in isolation or coming off of isolation will be notified.

Stay safe and keep warm,

Janet Morris
President and CEO
