UPDATE TO ALL FAMILY AND FRIENDS

Hello, we did not have any positive rapid tests for staff or designated caregivers since the last update on Friday!

The surveillance testing on Carlow has identified another resident who is positive and their family has been contacted. There are currently 8 residents who are positive for Covid19, with a number who are thankfully asymptomatic and who will be off of isolation and resolved at 10 days from the date that their positive swab was completed.

Over the weekend and as of today a number of residents are now off of isolation. In total, as of today, there are 41 residents who are in isolation as they were a close contact with someone who was identified as a positive case. These people will come off of isolation based upon the date of their close contact and the follow up surveillance testing results.

As always, there are also some residents who have symptoms who are in isolation awaiting the results of a test.

There are 15 staff members who remain off due to Covid19 and a number who are off due to a close community contact. We have also had a number of staff who are now resolved and can return to work and their normal life.

Take care and be safe,

Janet Morris
President and CEO
