## **UPDATE TO ALL FAMILY AND FRIENDS**

Hello, yesterday we received positive test result for a resident on Donegal who was a low risk contact with a positive student case last week. Given there are now two cases, Donegal is on outbreak precautions.

### **On Donegal only, the follow precautions are in place:**

- Everyone must wear mask and eye protection.
- Designated caregivers are encouraged to visit, but only one at a time.
- General visitors are not able to visit during the outbreak.

Over the weekend we also had a positive rapid test for a designated caregiver and a general visitor. There was no resident contact in the previous 48 hours so the resident is not considered a contact.

Be well and stay safe,
