UPDATE TO ALL FAMILY AND FRIENDS

Hello, unfortunately Kerry is now in outbreak. There are 3 staff who have tested positive and this meets the definition of an outbreak. The residents will be tested today and tomorrow.

Residents with any symptoms of Covid19 are immediately put into isolation and swabbed. We are swabbing for any respiratory illnesses as well as Covid19.

A resident on Carlow has possible Covid19 (low level result) and is being retested to confirm. Their contacts with residents are considered high risk contacts as they were not wearing masks. They are now in isolation while awaiting the second swab result.

We know that there is a high level of Covid19 in the community and everyone is encouraged to take all of the precautions necessary to protect you, your family and the residents at St. Pat's.

Stay well and be safe,

Janet Morris
President and CEO
