UPDATE TO ALL FAMILY AND FRIENDS

Hello, happy to report that St. Pat's has no outbreak at this time.

New Dietary Software

We are excited with the successful launch of our innovative dietary software, which has now been rolled out on 1st, 4th and 5th floors. Today we will be continuing the roll-out on Carlow with Cavan and 3rd floor to follow in the coming weeks. This program represents a significant step forward, not only streamlining our meal service but also enhancing resident safety and reducing our overall food costs.

Utilizing iPads for ordering, our software will automate the process, ensuring that specific resident needs are not only met but exceeded. Moreover, the system will feature photos of our showcase plates, a feature poised to significantly reduce our food costs. This strategic move allows us to redirect those savings towards providing higher quality, more delightful meals for our residents.

We are confident that this technological advancement will not only improve efficiency but also elevate the overall dining experience. We look forward to the positive impact this software will have on our residents' well-being and satisfaction. Cheers to a new era of excellence in dining services!

Reminder: Funeral Pre-Planning Seminar

St. Pat's is hosting a Funeral Pre-Planning Seminar as this is an initiative of our Palliative Care Committee.

Date: Thursday, March 21

Time: 6:00 pm

Location: Gathering Place on Ground floor

Jason Swan, who works for a local funeral home, will be joining us for an information session to learn about funeral pre-planning. We are not endorsing any funeral provider, but rather trying to present an education session for the St. Pat's family and friends who might benefit from this information.

This is an initiative of our Palliative Care Committee. If this information would be helpful to you, please do join us. Questions will be welcomed.

Be well and stay safe,

Monique Patterson

Interim President and CEO
