UPDATE TO ALL FAMILY AND FRIENDS

Hello,

Outbreak Status

We are currently outbreak free!

Information Session - Seniors' Affordable Housing Project

As some of you are aware, St. Patrick's Home is in the process of developing an affordable seniors' housing apartment building. Our vision is to serve and support vulnerable seniors who require the support of a community and/or a degree of assistance, who cannot afford living in a retirement home. This seniors' housing project is one of St. Patrick's current Strategic Priorities, "Work to evolve our campus of services and supports", while serving unmet needs in the community. We aim to develop an affordable housing apartment building for seniors, purpose built to include a range of social and health supports, in a community hub.

On Monday October 7, 2024 an informal information session regarding the seniors' housing project will be held from 9:30am - 3:30pm in the front lobby, with the Housing Development Coordinator, Cheryl Homuth. Staff, residents and family members are invited to drop by, look at the building plans, and ask questions. If you are not able to attend the information session but are interested in learning more about our seniors' affordable housing project, please contact Cheryl Plater at cherylplater@stpats.ca

Be well and stay safe,

Monique Patterson

Interim President and CEO
